SKILLS

Systems
Windows Server, Active Directory, GPO, Linux, Proxmox VE, VMware ESXi, Docker

Automation and CI/CD
Terraform, Ansible, GitHub Actions, GitLab CI/CD, Jenkins, Git

Monitoring and ticketing
Prometheus, Grafana, osTicket

Networking and services
DNS (Bind9), Apache, Nginx, Tailscale, Cisco CCNA-level training

Scripting
Bash, Python, JavaScript

Methodologies
Agile, Scrum

EDUCATION

Bachelor's degree in Information Technology
EPHEC, Louvain-la-Neuve · 2019 – 2024

Physics
UCLouvain · 2018 – 2019

CERTIFICATION

LPIC-1 (Linux)
In progress, target end of 2026

LANGUAGES

French: native

English: fluent (C1)

PROFILE

Junior systems administrator with a bachelor's degree in Information Technology (EPHEC). Experience administering Windows Server and Active Directory across a multi-site estate, automating infrastructure (Terraform, Ansible, CI/CD) and setting up monitoring (Prometheus, Grafana). Ran a high-availability Proxmox cluster from 2022 to 2026. Now rebuilding my homelab from scratch and documenting it every week. Looking for a systems administrator role in Belgium or Luxembourg.

PROFESSIONAL EXPERIENCE

International experience in Canada (Working Holiday)

Montreal, Canada · 09/2025 – 09/2026

- Home theatre sales advisor at Best Buy, then counter agent at Desjardins. Customer service in a bilingual French and English environment.

Systems Administrator, IT support team

Municipality of Virton, Belgium · 11/2024 – 08/2025

- Administered 2 Active Directory domains: users, groups, Group Policy (GPO) and Windows Servers.
- Maintained and supported a fleet of 200+ workstations across 4 sites, plus around ten servers.
- Designed and deployed a monitoring (Prometheus, Grafana) and ticketing (osTicket) solution as Infrastructure as Code (Terraform, Ansible, GitHub Actions), improving incident tracking and speeding up resolution.

Intern, project team

BCE · Broadcasting Center Europe, Luxembourg-Kirchberg · 11/2023 – 06/2024

- Developed a Python plugin for the internal IPAM and containerised the application with Docker.
- Designed and implemented the team's Git workflow and CI/CD pipelines.

Intern, IT Expertise in Health Data team

Luxembourg Institute of Health · 02/2023 – 06/2023

- Built a monitoring dashboard for the National Cancer Registry database (R, web technologies).

PERSONAL PROJECT: HOMELAB

Documented rebuild

Since 10/2026 · firminmoyen.dev

- Rebuilt from scratch, documented every week in French and English: journal, architecture decisions.
- Two Proxmox VE nodes in a cluster, an OPNsense firewall that isolates the lab from the home network and splits it into zones.
- Remote access via Tailscale (WireGuard VPN), with no services exposed to the internet.
- In progress: monitoring with Prometheus, Grafana and Uptime Kuma, then automation with Ansible and Terraform.

First homelab

2022 – 2026

- High-availability Proxmox VE cluster, monitoring with Prometheus and Grafana, self-hosted services.
- Wiped entirely in October 2026 to document everything from the start and rebuild on solid foundations.
